

RANDOM SHOTS

No 1

January 2015

r_j_coppola@hotmail.com

In **RANDOM SHOTS** I will be sharing, with you, selected links from my collection of shooting related “favourites” that I think may be of interest to the MVRRC members.

At first, the majority of the entries will reflect my interests, but hopefully, you will contribute ideas and/or links that you may have found which may be included in future columns.

Depending on other commitments, I am planning to try and produce a monthly **RANDOM SHOTS**. Wish me luck ☺

Also, please remember that anyone can publish something on the Internet. Therefore, neither *Musquodoboit Valley Rifle and Revolver*

Club (MVRRC) nor myself can verify the safety of any of the material linked to in **RANDOM SHOTS**. If you are in doubt about something, please get another opinion.

Also, the Web contents are not “etched in stone”. There is no guarantee that something that you are viewing today will be available tomorrow. Therefore, it’s advisable to download and/or print the item of interest.

Enjoy

Ralph J. Coppola

RANDOM SHOTS

[Eye Care for the competitive Shooter](#)

For those of us who wear glasses, our day-to-day eyewear is fine for normal use but may be lacking when it comes to shooting sports. This article is a set of guidelines that were written to assist your optomerist in perscribing you a pair of shooting glasses. While it is written for pistols can easily be transposed for rifle use. Don’t forget to order them in safety glass.

ORTHOPTICS

“seeing your way to shoot as the years advance”

The Aperture Front Sight

The use of the aperture front sight in target shooting allows the shooter to use the principle of concentric circles in aiming. Caution! Contains math. ☺

The British Army Lee Enfield no.4 and no.5 rifles

This is a “slide show” lecture on the No 4 & 5 Lee Enfield rifles.

Target Sights for the Lee Enfield Rifles

This is another “slide show” lecture. This time the subject covers the various types of target sights that were used on the Lee Enfield rifles.

Getting is Wrong!

Always verify the ammunition that you are going to use matches the chamber of your firearm. Mismatches can be disastrous.

The History of Ammo with Gunny R. Lee Ermey

I am including this video in order to show the danger of loading a muzzle loader while there is a live ember in the barrel. See the clip starting at “minute 9:00”. Keep your face AWAY from the muzzle!

Manuals, Manuals and more Manuals

This site contains an archive containing many firearm and military manuals. Note: Some links ask for a User Name and Password.

Use --- User Name --- manuals
Password ----- chipin

Historic Arms Resource Centre (UK)

You just have to check this site!

Hand Loader's Load Work Up Sheet

This log sheet was designed for Black Powder Cartridge loading.

Rifle Accuracy Reports

“Our main concern is the building up of extreme accuracy in your factory hunting rifle.”

The Accurate Shooter

This site was conceived as an authoritative reloading and technical resource for match calibres.

[The 100 ZERO Target](#)

The concept behind this Swiss precision grid target is to allow you to shoot a string of shots (with the same hold) without obliterating your aiming point.

[SiteLite Ballistic Targeting System](#)

This free software will assist you in bore sighting your rifle for any range up to 300 yds by automatically calculating and printing a customized laser bore sighting target for your specific rifle and ammo.

[Mathematics of Shooting](#)

POA / POI / MOA / Mil-dot / MPBR?

[Target Sports](#)

“Target Sports is Britain’s best technical magazine about guns and ammunition. Now free online, you can have unlimited access to the back catalogue of [features](#)”

[Target Rifle Basics: Part One](#)

CHRIS WHITE looks at the myth of the one-hole group, the concept behind groups, and how to make them smaller

[Why Not Get a Bloody Bipod?](#)

The “back firing position” is one of the items from the Long Range Target Shooting History on the Research Press site.

[IPSC](#)

Some of you may have wondered what are the *IPSC Practice Sessions*, that are scheduled on the MVRRC Web Site. Well, IPSC stands for *The International Practical Shooting Confederation*. Which is a shooting sport based on the concept of [practical shooting](#). Accuracy, power and speed are all required to achieve a maximum score.

[IPSC on YouTube](#)

This is a video clip from the Australasia 2013 IPSC competition.

Can't get to the range? Perhaps these simulators will keep you amused.

[Long Range Shooting Simulation Demo](#)

[Rifle Shooting Game](#)

[Pistol Shooting Game](#)

[EuroSimulator](#)

[Perhaps some people should not be allowed near firearms](#)

What can I say? ☺

[Open Carry?](#)

This is why we have a "Holster Course".
